DP-28NM4

DP28SW

This Outbound Relay Trigger Controller will enhance the existing DOORBELL FON™ system by providing dry contact closure off the star (\*) key on the telephone keypad. This product is a great add on component that will trigger an operation of numerous electrical devices that you may want to operate from your telephone by pressing "\*".

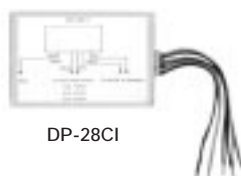

DP-28SW

### Add-on Modules:

DP28CI

This Inbound Relay Trigger Controller provides 800ms of dry contact closure. This unit is simply bridged to the door box leads. It is activated by the push button on the door box. Use this product for a doorchime, to activate a camera, or turn on a light.

DP-28CI

DP28T

This add-on module is a perfect solution when you are away from your premises. Connection of the DP-28T to your existing DoorBell Fon™ unit will allow you to answer your door or gate from your cellular phone. By incorporating a DP-28SW you can unlock a door or gate from your cellular telephone.
